

Help your child graduate to Abbott's Most Advanced Formula

If you face difficulty in switching or changing your child's formula, here are two recommended titration methods that will help your child accept the new flavours with greater ease and enjoyment.

Method 1: Volume Titration*

Feeding schedule 	Based on total volume of 180ml (6oz) per feed	
	Current milk brand	New Most Advanced GainIQ ^{Intestinal Quality} ® / GainIQ ^{Intestinal Quality} ® Kid ⁺
1 st week	120ml (4oz)	60ml (2oz)
2 nd week	60ml (2oz)	120ml (4oz)
3 rd week	0ml	180ml (6oz)

Method 2: Feeding Titration*

Feeding schedule 	Based on total of 4 feeds per day	
	Current milk brand	New Most Advanced GainIQ ^{Intestinal Quality} ® / GainIQ ^{Intestinal Quality} ® Kid ⁺
1 st week	3 feeds	1 feed
2 nd week	2 feeds	2 feeds
3 rd week	1 feed	3 feeds
4 th week	0 feed	4 feeds

*Please refer to the label on the milk can for age-appropriate feeding schedule for your child.

^Please refer to the feeding schedule on the milk can label for the number of scoops of milk powder needed to prepare the required volume of milk.
